

RUSS PEAK'S KEYNOTE

A/V REQUIREMENTS

I. LIGHTING

- Since Russ moves around during his presentation and is constantly interacting with his audience, we have found it works best if you leave the full house lights on during the program. Besides, studies show that your group will remember more and laugh more in the brightness.

II. AUDIO

- For the "Magic of the Mind" presentation, please provide Russ with a **HAND-HELD WIRELESS** microphone.
- Remember that good sound is crucial to the success of your program. If your sound system and microphone are not adequate, borrow or rent quality equipment. Please check these requirements with your sound tech or feel free to have the sound tech call Russ at 503-474-1464 for further assistance.

III. RECORDING POLICY

- Audio/video taping of Russ Peak's presentation is allowed with prior written consent for internal / non commercial use only. Russ Peak retains all commercial rights to video. Thank you for complying with this request.

PS Please provide Russ with a stool on the performance area.
